1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 9, drawn to an electrode, classified in class 607, subclass 36.
 - II. Claims 10 - 18, drawn to a cardiac pacing lead assembly, classified in class 607, subclass 119.
 - III. Claims 19 - 27, drawn to a cardiac pacemaker, classified in class 427, subclass 2.24.
 - IV. Claims 28 - 40, drawn to a method of electrode manufacture, classified in class 445, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II, III and I and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because any suitable electrode with a different material and assembly could be used in either of the combinations – pacemaker or the lead assembly. The subcombination has separate utility such as electrode for any conventional application where an electrode for transmission of current is desired.
3. Inventions IV and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2)

that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the electrode could be made a potentially different process such as suitably bonding the various layers in the electrode.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Attorney Kent Roberts on 05/14/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
